Sprint 02: Feature Enhancement and Integration

Due Date: Friday, November 13, 2025, 11:59 PM (MyLS submission)

Purpose

Sprint 02 continues the development process by extending your initial prototype into a more functional and integrated system. The goal is to deliver additional prioritized features from your product backlog, improve existing functionality, and strengthen system reliability through better testing and documentation. Teams are expected to show steady progress toward a cohesive, partially deployable product while maintaining Scrum best practices.

Deliverables

Submit **one PDF document**, the **updated Excel backlog file**, **and a short demo video (1-3 minutes)**.

1. **Cover Page**
    - Course code, project title, group ID, team member names, and roles (Product Owner highlighted).
2. **Sprint Goal (½ page)**
    - A clear statement summarizing the focus of Sprint 02 (e.g., "Integrate payment gateway and order-tracking modules into the existing e-commerce system").
    - Explain why these backlog items were selected and how they advance the overall project vision.
3. **Sprint Backlog (1-2 pages + Excel file)**
    - Select **4-6 user stories** from your Milestone 02 backlog assigned to Sprint 2.
    - For each story, include:
        - Story ID & Title
        - Story Points and Priority
        - Assigned Team Member(s)
        - Tasks (sub-activities/components)
        - Status (Not Started / In Progress / Done)
        - Notes on dependencies or integration needs
    - Update your Excel Product Backlog to show **Sprint Assignment = "Sprint 2."**
4. **Implementation Progress (1-2 pages)**
    - Summarize what was built and tested in Sprint 02.
    - Include screenshots, code snippets, or UI views demonstrating new features or improvements.
    - Highlight how your team handled integration between new and existing modules.
    - Identify technical challenges encountered and how they were addressed.
5. **Demo Video (1-3 minutes)**
    - Record a short screencast showing the **functional parts of your system** developed or improved in Sprint 02.

- Narrate briefly to explain what is being demonstrated (e.g., new feature workflow, integration results, or test outcomes).
- Upload the video to MyLS or provide a link (YouTube Unlisted, OneDrive, or Google Drive with access enabled).

6. **Testing and Review (1 page)**
   - Document test cases and verification results for each completed story (pass/fail).
   - Discuss any automated or manual testing methods used.
   - Summarize feedback from Product Owner and team review sessions.
7. **Updated Team Blog (Excel Template)**
   - Continue updating meeting notes, task assignments, and progress since Sprint 01.
   - Submit separately as **GroupID-Blog.xlsx**.

Evaluation (5%)

Component	***Marks***	***Criteria***
Sprint Goal & Backlog Planning	1	Clear, achievable goal; backlog items well selected and documented with priority and responsibility.
Implementation Progress	2	Demonstrated working features and integration with evidence (screenshots/code).
Testing & Review	1.5	Thorough testing and validation of acceptance criteria; clear review results.
Blog Updates	0.5	Comprehensive and up-to-date record of meetings, tasks, and decisions.

Notes

- Use daily Scrum meetings to track progress and address impediments.
- Expect approximately **15 hours of work per team member** for this sprint.
- **Sprint 03** will focus on system integration, testing, documentation, and final delivery planning.
